INTERREG ITALY-CROATIA PROGRAMME 2021 – 2027

D.E.C. DIGITAL ETHICS CULTURE PROJECT Memorandum of Understanding (MoU)

DEC – Digital Ethics Culture project

Memorandum of Understanding

The objective of this Memorandum of Understanding (MOU), initiated by the DEC-Digital Ethics Culture project, financed by the European Program Interreg Italy-Croatia, is to enhance the establishment and continuity of the transnational and multi-stakeholder dynamic cooperation to promote technological awareness among citizens and young people through concrete and specific actions, enabling future generations to manage new technologies responsibly and consciously in an open bilateral and multilateral long-term framework of international relations. DEC-Digital Ethics Culture Memorandum of Understanding is perfectly in line with the goals of the 2021-2027 Interreg Italy-Croatia Program.

We, representatives of the DEC partners EU Relations GEIE, Metkovic Municipality, Odòs Social Cooperative Society, supporting the DEC-Digital Ethics Culture project and its goals, strongly believe that we need to improve the understanding of the many chances and risks related to the AI, data protection and cybersecurity, in most of the professional sectors and young people.

More specifically, we, signatories of this MOU,

Being aware of and concerned about the need for greater awareness and new professional skills in the IA, cybersecurity and data protection,

Believing that the DEC project deliverables and specific actions represents an important contribute to the progress of citizens and professional sectors and the development of digital awareness in the partners' territories and moreover,

Building on existing trends deriving from EU initiatives and frameworks,

Acknowledging the results of all activities in the frame of the DEC-Digital Ethics Culture project, involving partners and relevant target groups, representing the 3 partners' areas in Italy and Croatia (Campobasso, Metkovic, Jesi),

Having agreed on the above, we state our intention to:

- ∇ Evaluate the use of the DEC project tools and achievements for a follow-up proposal to implement the next steps of the DEC developed network of staffs, ambassadors and their stakeholders, to assess the feasibility of further initiatives of bilateral/multilateral cooperation among the signatories of this MoU, as well as also with future interlocutors, stakeholders and representatives of public and private institutions or organizations which may be interested to capitalise the achievements of the DEC project and therefore be potential subscribers of this MoU in the future.

- ▽ Improve our level of digital culture and digital security in the partners' territories, pushing the digital transition in an ethic, aware and conscious framework for citizens and professional sectors.

We, the signatories, are committed to the intentions stated above. Also, we recommend that the European Commission should continue to support initiatives towards awareness raising activities and useful action to support the digital transition.
