 DIGITPORTS

High Level Training on Digital Twin Applications in Port Ecosystems

Venice 28th Jan 2025

www.italy-croatia.eu

The Syllabus

Welcome to this (intense) day of training

As you will see

there is no a single definition of a Digital Twin

as a Digital Twin is not a software or a digital system but rather a digital paradigm

We will offer you some highlights

taken from different perspectives

and sometimes borrowed from infrastructural worlds different from ports

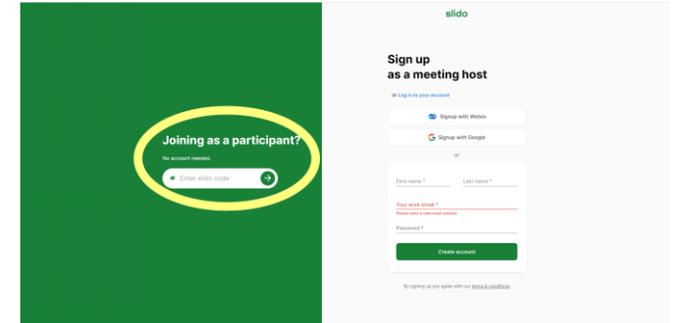

Some guidelines

The agenda is highly packed, in order to maximise the content delivery. Questions will be allowed only during the Q&A slots, and don't forget the microphone, otherwise remote participants will not hear you

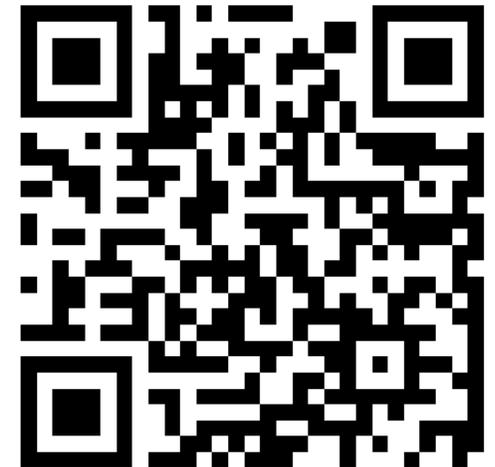

Remote participants may convey their questions using the Slido app (and not the Zoom chat). Questions may be voted and thus ranked

We will be using Slido to collect your feedback

Please go to <https://www.slido.com/>, press «Sign Up» and enter code **3683110** to «Joining as a participant»

or use the QR code

Some guidelines

At the end of the day, along with the training feedback, we will collect your suggestions on a list of topics for an-online follow up, scheduled in the next weeks

All the speakers will be glad to answer your questions during the «social» time of the coffee break and the cocktail

Let's build our word cloud

Go to Slido

Let's begin writing down five words you associate with Digital Twin
(we will collect them for a few minutes after the start of the first speech)

 **DIGITPORTS**

...and Set our Baseline

Go to Slido

Please answer a simple question

We'll be back on that at the end of the day
