Date	21/11/2022
Location	Karlovac (HR) – Karlovac Gymnasium
Number and type of participants:	100 high school students.
Description: On November 21, 2022, Karlovac County, held an INFO DAY at the Karlovac Gymnasium addressed to the school students. The goal of this event was to present the STREAM project and to make the students aware of the potential threats of floods in Karlovac County. The presentation was given by some technicians from the Karlovac County and their external experts. The young group of participants showed awareness of the risk of floods, which are very common in Karlovac County, and they became familiar with the tools and flood defence systems, which are being developed within STREAM. An informative desk was set up in the school lobby from 9 am to 11 am where the students received useful materials and were informed about the tools and plans for early warning and flood risk monitoring.
