

Fisheries in the Adriatic Region a Shared Ecosystem Approach

**FROM SHARED RESOURCES
TO JOINT SOLUTIONS**
**INTEGRATING PROCESSES
FOR A SUSTAINABLE FISHERIES**

The **FAIRSEA** objective is to implement an innovative approach integrating environment, resource and fisheries dynamics into a conceptual and operational framework for the sustainable management of Adriatic fisheries. The integration is adapted to address stakeholders' and policy makers' issues and is used for increasing awareness, understanding EAF, for increasing technical skills and capacities.
