World Oceans Day

The Adswim didactic lab and workshops with the Institute of Public Health Zadar

Zadar, June 8, 2020

On the occasion of the World Ocean Day, and as part of the implementation of educational activities of the Interreg project AdSWiM - Managed use of treated urban wastewater for the quality of the Adriatic Sea, a didactic laboratory for children was held on the city beach Jadran in Zadar.

Employees of the Department of Health Ecology and Environmental Protection of the Zadar Institute of Public Health, in cooperation with the project partner Split Water and Sewerage Company Ltd (Vodovod i kanalizacija Split), tried to bring the value and importance of preserving the quality of the Adriatic Sea closer to the youngest residents of our city with story, joint practical work related to wastewater treatment methods with simple experiments, games and socializing.

As part of the activities, children experienced a visual demonstration of a simple way of wastewater treatment (filtration), learned about the importance of economical use of drinking running water, reducing pollution, recycling and/or reuse of non-degradable materials and learned about various plants and animal species living in Adriatic and in the coastal areas.

The children also made the Zadar "sea postcard" to say to the adults how much the sea means to them.

For more information check our website and social media or write to us: adswimcommunication@gmail.com
Institute of Public health Zadar in collaboration with the project partner Split Water and Sewerage Company, organized a workshop for youngest citizens on the #Zadar local #beach. As part of the activity, children experienced a simplified visual demonstration for wastewater depuration (filtration), learned the importance of economical use of drinking running water, reduce water and sea pollution, recycle and/or reuse of non-degradable materials and learnt about various plants and animal species living in Adriatic and in the coastal areas.

Creative little hands also made a Zadar "sea postcard" and announced how much the sea means to them!
