ADRIJOROUTES
ADRIATIC THEMATIC JOURNEYS

The Adriatic Sea has long been a bridge between Italian and Croatian cultures - a vast blue horizon connecting people, stories, traditions, and ideas for thousands of years. Inspired by this vision, ADRIJO was created: a cultural network of Adriatic ports and an online virtual museum that tells the story of the Adriatic as if it were a great novel. Through the Adrijoroutes project, this narrative continues to unfold and can be explored by navigating seven distinct routes, featuring **alternative historical itineraries, hidden treasures, natural wonders, architectural heritage, food and wine experiences, ancient trade and travel routes, and UNESCO World Heritage sites.**

Discover new and exciting travel perspectives across an extraordinary sea, narrated by the eight ports that stand at the heart of this unique Mediterranean basin. With destinations continuously updated, the project invites curious travelers to explore it online at adrijo.eu/en
