

THE BLUE RECHARGE Project's Newsletter

Blue Credits for Water Aquifers Recharge and Sustainability

Last November 14th 2024 in Padua, the **2nd Steering Committee meeting was held**. During the meeting, important topics were discussed, such as:

- Italian and Croatian regulations for managing groundwater aquifer recharge,
- Results on European groundwater aquifer recharge best practices analysis,
- The feasibility study of a blue credit management mechanism.

Moreover, on November 15th 2024 **the BLUE RECHARGE project was presented at the Padua Fairgrounds** during the event on the development of cultural and creative enterprises, organized by the RIR Venetian Innovation Cluster for Cultural and Environmental Heritage. **The Lead Partner the City of Vodnjan-Dignano held a workshop** to promote the project's activities and goals, increasing the project's visibility among universities, local authorities, such as Veneto Region and Emilia Romagna Region, and the public.

Italy – Croatia

 BLUE RECHARGE

Besides, at the same event, the BLUE RECHARGE project's partners participated in the networking and B2B sessions to foster collaborations with European and regional companies and public bodies.
