The Mediterranean Multi- Programme Mechanism (MMM)

Coordinated Call for Proposals

16 June 2026

About the MMM

24 countries in the Mediterranean 10 Interreg Programmes

- Interreg Italy-Croatia
- Interreg Euro-MED
- Interreg NEXT MED
- Interreg Italy-France Maritime
- Interreg Greece-Cyprus
- Interreg Italy-Malta
- Interreg Italy-Tunisia
- Interreg Italy-Slovenia
- Interreg IPA South Adriatic
- Interreg IPA ADRION

Why This Call

Upscaling Interreg results across the Mediterranean area and territories

Ensuring that existing results are not isolated but reused, transferred and amplified

...From Projects to Impact

Capitalising and transferring knowledge is the engine of this call — moving from fragmented local outputs to coordinated, scalable solutions that operate at Mediterranean scale, or conversely, bringing transnational insights down to concrete cross-border and local territorial change.

Core Objective

Capitalisation projects under the MMM must:

Reuse Existing Outputs

Use of the joint MMM database is compulsory. Projects must build on outputs already produced within the MMM ecosystem.

Transfer to New Areas

Outputs must be transferred to new territories and stakeholders, extending their reach beyond the original context.

Scale Their Impact

Projects must demonstrate a credible pathway to scaling impact across the broader Mediterranean cooperation area.

...Synergies Are Central!

Synergies are a **fundamental requirement**.

Partners must:

Valorise and adapt outputs from other programmes

Plan exchanges from the start

Work across cooperation areas and programmes

What Makes a Strong MMM Project?

- 1 Clear identified output coming from another MMM programme (**starting**)
- 2 Credible transfer and adaptation strategy (**embedding**)
- 3 Strong partnership enabling uptake (**skills**)
- 4 Explicit link to policies and territorial needs (**target**)
- 5 Built-in cooperation and knowledge exchange (**methodology**)

Top Mistakes to Avoid

⊗ Avoid these common pitfalls when designing your MMM capitalisation project.

⊗ Starting from Scratch

Designing a project without a clear existing output to build upon defeats the purpose of capitalisation.

⊗ Single Programme Logic

Staying within one programme's logic with no transfer dimension misses the core MMM requirement.

⊗ Vague Transfer Plans

A weak explanation of how transfer will concretely happen undermines the credibility of the entire application.

⊗ No Added Value Evidence

Failing to demonstrate added value in the new territory leaves evaluators unconvinced of the project's merit.

⊗ Optional Synergies

Treating synergies as optional rather than central to the project design is a fundamental misunderstanding of the call.

Inter-Programme Coordination

Each programme operates independently within a **common MMM coordination framework**:

MMM Level — Common Elements

- Shared thematic focus
- Joint list of outputs to be capitalised and transferred
- Project overlap period for coordination and exchange

Programme Level — Independent Elements

- Budget and duration decisions
- Partnership composition, including associated partners (**new comers are allowed if eligible to the chosen programme**)
- Eligibility rules, submission and selection procedures
- Contracting processes

Specific Objectives

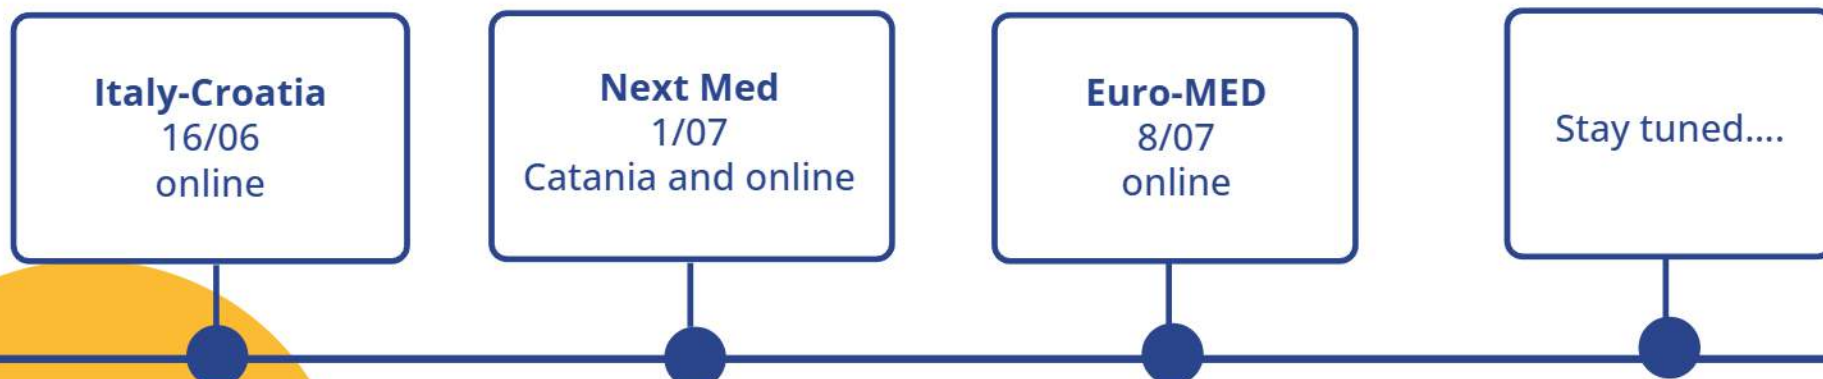

COORDINATED CALL

Mediterranean Multi-Programme Mechanism

Upcoming call presentation events

The call will be launched separately by each MMM Programme, with different timelines. Here are the upcoming events for each Programme to present the call:

Take-Away

From isolated results to Mediterranean-wide impact and/or concret local territorial changes

Design projects demonstrating transfer, scalability and real added value capacity
