Abstract

BLUTOURSYSTEM provides tourism operators with tools and skills to develop new business ecosystems. Capitalizing the knowledge gained with TourMedAssets, the project steers decision makers to rethink tourism, reduce gaps and design eco-innovative scenarios thus to promote sustainable growth. The project aims to stimulate competitiveness, innovation and creative enhancement of the tourism offer. The main aim is to enrich the analytical skills of stakeholders in order to improve the sustainable and creative tourism sector, while developing new knowledge based on advanced tools and services. For this reason, learning sessions have been activated in some pilot areas in the eligible areas of the program and other dissemination and formative activities, for local actors. Specific information about gaps and needs have been thus collected through interviews submitted to stakeholders, who represent both public and private sector in the tourism field. WP4 has been then planned to achieve the specific objective 2 “Improving skills and capacities to develop new Blue Tourism CBnetworks and business ecosystem”.

Deliverable 4.1.3: this report describes scheduled multi-stakeholders activities (seminars, networking and peers learing, scenarios workshops).
